If you want a question to be slightly different, you can change it. How it works: You can also do tile charts across the page to maximize your paper usage. When you print a task, you choose how the answers are reported: On a response sheet On a response sheet with only the odds In the context (hereinafter or within the question) No response sheet complements your lessons with high-quality graphics and graphic paper of any size. Merge two or more tasks in one. Export questions like bitmap images and paste them into your favorite word processing software. This feature is at the heart of our software and it is what makes it so powerful: you choose the properties of the questions, not the questions themselves. If there is a choice you don't like, you can change it. Print tasks on any size paper your printer supports. All questions are available for export.
